

FRACTAL SYSTEMS TO PRESENT AT THE PROPEL ENERGY TECH FORUM AND THE CANADIAN FINANCING FORUM

Conferences Bring Together Innovation and Capital

Calgary, Alberta – Fractal Systems announced today that the company has been selected to present at two upcoming investor conferences - the PROPEL Energy Tech Forum and the Canadian Financing Forum during March 2016.

The 3rd Annual PROPEL Energy Tech Forum will be held in Calgary on March 16 and 17. PROPEL is the Energy Technology Venture Forum that brings together the best, boldest, most innovative emerging and established energy technology companies with investors.

The Canadian Financing Forum will be held in Vancouver on March 22 and 23. The Forum features presentations from Canada's most promising technology companies, as approximately 40 technology companies compete for the attention of top tier investors from across Canada and the United States.

Fractal's technologies are becoming recognized for supporting the efficient development of Canadian bitumen and extra heavy oil:

- Enhanced JetShear™ and ARP™ can significantly reduce the cost of transporting heavy oil while improving the price received for the product.
- The technology is viable in today's challenging price environment.
- Broad use of Enhanced JetShear™ can lead to 20 to 25% greater utilization of pipeline export capacity.
- Enhanced JetShear™ results in lower GHG emissions for transporting heavy oil to market.

As an indication of the broad support being attributed to Fractal's technology platform, Sustainable Development Technology Canada has awarded \$3.7 million to field Fractal's Enhanced JetShear™ and ARP™ technologies.

Fractal Systems Inc. is a private Canadian company with offices in Calgary, Alberta and Sherbrooke, Quebec. Fractal is engaged in the business of partial upgrading heavy oil and bitumen, by applying proprietary technology that has **significant cost advantages** over alternatives. The company will be active in manufacturing & licensing systems to oil producers and mid-stream companies.

Jetshear™, Fractal System's first technology, has been **successfully field demonstrated** in Canada. The technology dramatically reduces the viscosity of heavy oil allowing the oil to move more freely in pipelines for transportation. This result provides the owner or transporter of the oil to significantly reduce their costs associated with moving it.
